*Examiner's Statement of Reasons for Allowance*

1. Claims 74, 77-78, 80-81, 84-85, 87-88, 91-92, 94-95, 98-99, 101-102, 105-106, 108-113 are allowed.

2. The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to teach, in combination with the remaining elements:

a property page for adjusting a tone curve for an image acquisition device, wherein said tone curve shows a transfer function for relating input ones of the image acquisition device to output tones, said property page having at least first and second selection elements displayed within the property page, each of the at least first and second selection elements for selecting and displaying a different appearance of a tone control region of the property page, wherein the first appearance of the tone control region includes user-manipulable controls whose manipulation is reflected in said tone curve, and wherein the second appearance of the tone control region includes a directly manipulable editable tone curve as recited, or similarly recited, in claims 74, 81, 88, 95 and 102.

The closest prior art, Adobe PhotoDeluxe, and Moon et al. teach a similar method, in which a user interface provides property pages having different control interfaces to manipulate picture quality. However, neither Adobe PhotoDeluxe nor Moon et al. teaches appearances of tone control regions to include user-manipulable controls being reflected in a tone curve as well as a directly manipulable editable tone curve as claimed. Therefore, all applied prior art fail to anticipate or render the above cited limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
